Experience

pump.fun - Remote

Staff FullStack Developer

01/2025 - ~

- Token Launcher
- React, Node, NestJS, Next.js

At Pump, I worked on the main pages, and on the coin creation flow, improving the reliability of the codebase, and improving the UI. I've also reduced the number of sessions with errors from around 38% to 95%.

Kraken - Remote

Senior Frontend Developer

10/2023 - 12/2024

- Centralized Exchange
- React, Redux Toolkit, Node

At Kraken, I worked on the PRO trading app, from order form to charts, keeping it well tested and with the performance it required. One thing to highlight is that I've reduced the network errors that we were encountering, increasing our revenue per session in more than 10%. I've also owned many data visualizations created for the PRO exchange.

Violet - Remote

Senior FullStack Developer

07/2022 - 09/2023

- Decentralized Exchange
- React, Typescript, Node

At Violet, I created and maintained the KYC flow, as it was the core product, and also created several smaller projects, like Mauve, a UniSwap fork with Violet implemented. As the lead Frontend Engineer, I've also led the team while creating our own design system, increasing the productivity and reliability of our apps.

Blockchain.com - Remote

Senior Frontend Developer

11/2020 - 07/2022

- Crypto Wallet
- React, Redux, Node

At Blockchain.com, I created and maintained the web wallet, payment system, KYC and everything related to charts, tests and stability of the platform. I was the lead of the new payment systems implementation, increasing our payment acceptance rate from 30% to 80% in 2 weeks.

Game Analytics - London - GB

Senior Frontend Developer

08/2019 - 11/2020

- Analytics for Mobile Games
- React, AWS, Node, UI and UX

At GameAnalytics, I led the frontend team in developing a new platform. My responsibilities included architecting the application structure, implementing key features, and ensuring code quality through thorough testing and code

reviews. I was the creator of all the data visualizations on the dashboard, generating performant charts with billions of datapoints.

Intrasurance - Lisbon - PT

Frontend Developer

11/2018 - 08/2019

- Insurance Company
- React, Redux, Azure DevOps, UI and UX

At Intrasurance, I developed the core product, an insurance widget. This widget was designed to be embedded on customers' websites, allowing them to offer our insurance products. My primary responsibility was to create and implement this widget, ensuring its functionality and compatibility across various platforms.

Norio Matsubara - Faro - PT

Full Stack Developer

09/2017 - 11/2018

- Investor
- React, PostgreSQL, MongoDB, Node, Scrum, UI and UX

My job with Norio was to be his right-hand person. He is an investor who has capital invested in several startups worldwide, and my role was to analyze the technical aspects and provide assistance when needed. I worked in various fields, but primarily focused on reducing technical debt and implementing agile processes.

Mestres Ninja - Curitiba - BR

Full Stack Developer

02/2016 - 09/2017

- Marketplace for Freelancers
- React, MongoDB, PostgreSQL, Python

I co-founded this startup with two friends. We developed a dashboard that enabled customers to hire freelancers in a way similar to Uber. The most active developers were notified and went to the customer.

Education

Computer Science - Universidade Federal de São João del Rei

Language

Portuguese: Native

English: C2 (CEFR)
